Mr.

Tristan Germer, B.A.

Date of Birth:	19.10.1981
Citizenship:	Germany
Code for study programme:	M 992 601
Registration number:	01565429

NOTIFICATION

You have duly completed the

University course
Professional MSc, Vertiefung: Technische Kommunikation

in accordance with the Austrian University Act (UG) 2002, BGBl.I Nr. 120/2002, and the decree issued by the Senate published at the notification bulletin of the Universität für Weiterbildung Krems, No. 15 from 22 February 2008.

In accordance with Section 87 para 2 of the Austrian University Act 2002 in connection with § 3 para 3 lit. 1a, part II, Statute of the Universität für Weiterbildung Krems, published at the notification bulletin of the Universität für Weiterbildung Krems No. 36 from 16 April 2018, I herewith confer upon you the academic degree of

Master of Science

(MSc)

INFORMATION ON RIGHT TO APPEAL
The right to appeal against this judgement can be exercised by applying to the Federal Administrative Court. The appeal must be addressed within four weeks after the issue of this judgement in writing to the Division of Education Law, Director of Studies, Mag. Vera Ehgartner (Dr. Karl- Dorrek- Str. 30, 3500 Krems). The appeal must identify the judgement being disputed and must contain an application with justification for the appeal.

LEGAL BASIS
Articles 7 and 17 of the administrative jurisdiction of the implementation law (BGBl. [Federal Law Gazette] I no. 33/2013)
Articles 56 onwards of the General Administrative Procedures Act(BGBl. no. 51/1991) as amended

Krems, 19.04.2018

Director of Studies
Mag. Vera Ehgartner

Donau-Universität Krems

Danube University Krems - Austria

Dr.-Karl-Dorrek-Strasse 30, A-3500 Krems

DIPLOMA SUPPLEMENT

This Diploma Supplement follows the model developed by the European Commission, Council of Europe and UNESCO/CEPES. The purpose of the supplement is to provide sufficient independent data to improve the international "transparency" and fair academic and professional recognition of qualifications (diplomas, degrees, certificates etc.). It is designed to provide a description of the nature, level, context, content and status of the studies that were pursued and successfully completed by the individual named on the original qualification to which this supplement is appended. It should be free from any value-judgements, equivalence statements or suggestions about recognition. Information in all eight sections should be provided. Where information is not provided, an explanation should give the reason why.

1	**Information identifying the holder of the qualification**	
1.1	Family name(s)	GERMER
1.2	Given name(s)	Tristan
1.3	Date of birth (DDMMYYYY)	19.10.1981
1.4	Student identification number	01565429
2	**Information identifying the qualification**	
2.1	Name of qualification, title conferred *)	Master of Science (MSc)
2.2	Main field(s) of study for the qualification	University course; Professional MSc, Vertiefung: Technische Kommunikation
2.3	Name and status of awarding institution *)	Donau-Universität Krems, Universität
2.4	Name and status of institution administering studies *)	Donau-Universität Krems, Universität
2.5	Language(s) of instruction / examination	German / English
3	**Information on the level of the qualification**	
3.1	Level of qualification	University course (UNESCO ISCED Code 7)
3.2	Official length of programme	2 years (4 semesters)
3.3	Access requirement(s)	see curriculum http://www.donau-uni.ac.at/Mitteilungsblaetter
4	**Information on the contents and results gained**	
4.1	Mode of study	Course
4.2	Programme requirements	see curriculum http://www.donau-uni.ac.at/Mitteilungsblaetter
4.3	Programme details (Modules and units completed) and grades obtained / ECTS credits	see curriculum http://www.donau-uni.ac.at/Mitteilungsblaetter and certificate of the final examination ECTS Credits: 120

* in original language (German)

4.4	Grading scheme, grade translation and grade distribution guidance	Austrian grading: "excellent" (1) "good" (2) "satisfactory" (3) "sufficient" (4) "unsatisfactory" (5) "successfully completed" "not completed"	Evaluation: Outstanding performance Above the average standard, but with some errors Generally sound work with a number of notable errors Performance meets the minimum criteria Substantial improvement necessary; requirements of further work Positive performance, where a strict differenciation is not adequate Negative performance, where a strict differenciation is not adequate
4.5	Overall assessment of the qualification *)	"mit Auszeichnung bestanden" "bestanden" (possibly together with overall grade in the meaning of the Exchange of notes, Federal Legal Gazette III No. 45/2001)	pass with distinction (in case of excellent performance) pass (in case of positive assessment)
5	**Information on the function of the qualification**		
5.1	Access to further study		
5.2	Professional status conferred		
6	**Additional information**		
6.1	Additional information		
6.2	Further Information Sources	http://www.donau-uni.ac.at http://www.bmwf.gv.at http://www.oead.ac.at	
7	**Certification of the supplement**		7.4 Official stamp
7.1	Date	19.04.2018	
7.2	Signature / name	Brigitte Müllauer Head Academic Service Center Unit	
7.3	Capacity	for the Director of Studies	

8 Information on the Austrian higher education system

Post-secondary Education in Austria

- The Austrian post-secondary university sector (Hochschulsektor) consists of
  - Public universities (Universitäten), maintained by the state;
  - Private universities (Privatuniversitäten), operated by private organisations with state accreditation;
  - Maintainers of university of applied sciences degree programmes (Fachhochschul-Studiengänge) incorporated upon the basis of private or public law and subsidised by the state, with state accreditation (some of which are entitled to use the designation Fachhochschule);
  - University colleges of education (Pädagogische Hochschulen) maintained by the state or operated by private organisations with state accreditation;
  - The Institute of Science and Technology Austria;
  - Universities of philosophy and theology (Philosophisch-Theologische Hochschulen), operated by the Roman Catholic Church.
- The non-university post-secondary sector (außeruniversitärer postsekundärer Sektor) consists of
  - Military academies (Militärische Akademien);
  - Vienna School of International Studies (Diplomatische Akademie);
  - Certain training institutions for psychotherapists (Psychotherapeutische Ausbildungseinrichtungen);
  - Conservatories (Konservatorien).

The following text addresses exclusively the university sector.

Overall Structure of University Education
There are currently two different systems of degree programmes in Austria: a newer system, based on the European Higher Education Area (Bologna process), and a former one, dating from before the European Higher Education Area.

• The new system is based on the distinction between undergraduate and graduate studies. Upon completion of an undergraduate programme (Bachelorstudium at universities and university colleges of education or, respectively, Fachhochschul-Bachelorstudiengang at universities of applied sciences, comprising 180 to 240 ECTS credits), a bachelor's degree (designation: „Bachelor of/in ...") is awarded. Upon completion of a graduate programme (Masterstudium at universities and university colleges of education or, respectively, Fachhochschul-Masterstudiengang at universities of applied sciences, comprising 60 to 120 ECTS credits), a master's degree (designation: „Master of/in ...") is awarded. In the fields of engineering, the designation of the master's degree can also be „Diplom-Ingenieur/in".

• Under the auspices of the older system of diploma programmes (Diplomstudien), the first degree awarded is the diploma degree (Diplomgrad). An Austrian higher secondary school leaving certificate or its equivalent is the general qualification necessary for enrolling in a diploma programme; conclusion of a diploma programme entitles degree holders to enrol in doctoral programmes. A diploma degree (Diplomgrad) is awarded by Austrian universities after a course of study consisting of 240 to 360 ECTS credits. Full degree titles are gender specific designations: Magister for men; Magistra for women. Degree titles also include a general description of the field of study in which they were obtained, e.g. Magister philosophiae. In the fields of engineering, the degree titles are Diplom-Ingenieur/in. Degrees awarded in medicine and dentistry are exceptions to the above. The first degrees awarded after the completion of these degree programmes consisting of 360 ECTS credits are Doctor medicinae universae and Doctor medicinae dentalis, respectively.

Graduates of university of applied sciences programmes that consist of 240 to 300 ECTS credits are awarded, analogous to university studies, a university of applied science diploma degree (Fachhochschul-Diplomgrad) contingent upon discipline: either a Diplom-Ingenieur/in (FH) for fields of engineering or Magister/Magistra (FH) in other fields of study.

Some study programmes for teachers' qualifications are offered jointly between universities and university colleges of education.

Recipients of these diploma degrees from the old system or master's degree from the new system (including the ones awarded in both cases by the universities of applied sciences) are entitled to enrol in doctoral programmes (Doktoratsstudium) at universities. A doctoral degree with the designation either "Doktor/in" or "Doctor of Philosophy" (PhD) is awarded upon completion of a doctoral programme with a minimum duration of three years.

In addition to the degree programmes (ordentliche Studien) described above, non-consecutive certificate programmes (außerordentliche Studien) are offered, for example in the form of university programmes for further education (Universitätslehrgänge) or individual units / modules in scientific subjects, both at universities; certificate university of applied sciences programmes for further education (Lehrgänge zur Weiterbildung) or individual units / modules in scientific subjects at universities of applied sciences; and certificate university college programmes for further education (Hochschullehrgänge) at university colleges of education.

Bachelor Programme (Bachelorstudium)

Admission to a bachelor programme is granted upon the basis of the Austrian higher secondary school leaving certificate (Reifezeugnis), its foreign equivalent, or the successful completion of a special university entrance qualification examination (Studienberechtigungsprüfung). Students of compulsory lower schools who have completed additional schooling in the form of apprenticeships as skilled workers may take a vocationally based examination acknowledged as equivalent to the higher secondary school leaving certificate (Berufsreifeprüfung). Admission to bachelor programmes in the arts is based on aptitude ascertained by admission examinations. Admission to university of applied sciences bachelor programmes is is also possible on the basis of previous vocational or technical experience and qualifications of the applicants. In some university bachelor programmes, in most university of applied sciences bachelor programmes and in bachelor programmes at university colleges of education, admission is based on a selective admission process.

DIPLOMA SUPPLEMENT

Areas/modules of study (Fächer/Module) are specified in curricula. As a rule, the completion of two substantial bachelor papers or projects (Bachelorarbeiten) are required for awarding the degree. University of applied sciences bachelor programmes, bachelor programmes at university college and some bachelor programmes at universities include an internship or practical training. The programme can conclude with a bachelor examination (Bachelorprüfung).

Master Programme (Masterstudium)
Admission to a master programme is granted on the basis of the successful completion of a subject relevant bachelor programme or an equivalent post-secondary qualification. In some master programmes admission is based on a selective admission process.
Areas/modules of study (Fächer/Module) are specified in curricula. A core requirement is the compleion of a master thesis (Masterarbeit). This degree programme concludes with a master examination (Masterprüfung).
The approval of the master thesis (Masterarbeit) is a prerequisite for admission to this examination.

Diploma Programme (Diplomstudium = old system)
Admission to a diploma programme is granted upon the basis of the Austrian higher secondary school leaving certificate (Reifezeugnis), its foreign equivalent, or the successful completion of a special university entrance qualification examination (Studienberechtigungsprüfung). Students of compulsory lower schools who have completed additional schooling in the form of apprenticeships as skilled workers also may take a vocationally based examination acknowledged as equivalent to the higher secondary school leaving certificate (Berufsreifeprüfung). Admission to diploma programmes in the arts is based on aptitude ascertained by admission examinations. Admission to university of applied sciences diploma programmes may also take place upon the basis of previous vocational or technical experience and qualifications of applicants. In some fields of study (e.g. Human Medicine and Dentistry, and university of applied sciences diploma programmes) admission is based on a selective admission process.
A degree programme may be divided into stages (Studienabschnitte). The length of each stage of the degree programme as well as the areas of study (Fächer) and content required are articulated in curricula that distinguish between required subjects (Pflichtfächer) and electives (Wahlfächer). Each stage concludes with a diploma examination (Diplomprüfung). University of applied sciences diploma programmes and some diploma programmes at universities include an internship or practical training. The approval of a diploma thesis (Diplomarbeit) is a prerequisite for admission to the concluding diploma examination.

Doctoral Programme (Doktoratsstudium)
Admission to a doctoral programme at a university is granted on the basis of the successful completion of a subject-relevant diploma or master programme. Contents and requirements of study are specified in curricula with the focus on the doctoral thesis (Disser-tation) as the result of independent research. This degree programme concludes with the approval of the dissertation and with a comprehensive doctoral examination (Rigorosum) or a defensio. At universities of applied sciences and at university colleges of education no doctoral programmes are offered.

Evaluation of performance and grading system (Austrian grading scale)
According to the modalities for examinations outlined in the curricula, achievement may be assessed by oral and written exams or project related work. In principle oral examinations are open to the public.

Austrian Grading	Definition
1	EXCELLENT (SEHR GUT)
2	GOOD (GUT)
3	SATISFACTORY (BEFRIEDIGEND)
4	SUFFICIENT (GENÜGEND) (minimum positive grade)
successfully completed	Positive performance, where a strict differentiation is not adequate
5	INSUFFICIENT (NICHT GENÜGEND)
not completed	Negative performance, where a strict differentiation is not adequate

Grades for comprehensive examinations, i.e. examinations covering materials from various subjects:
positive: mit Auszeichnung bestanden (pass with distinction)
mit gutem Erfolg bestanden (pass with merit)
bestanden (pass)
negative: nicht bestanden (insufficient)
